BRIGHTFLOW COMPLETE AIR MANAGEMENT SOLUTIONS

With a modest and a humble beginning in the year 1979, the history of our existence took turn as the family run contractual business diversified. We continued and specialized further with the most prestigious and internationally renowned 3, 4 & 5 star Hotels and as we cemented the story of our success in those areas, we eventually followed it up with expansions of our execution activities in other fields of operation.

In view of the tough business competition, we accepted all sorts of jobs apart from supply installation testing and commissioning of HVAC Systems, be it fire fighting, hydropneumatic system, underground oil storage tank, day oil tank and any other type of special intricate fabrication required in the building construction.

We developed a dedicated team and started taking jobs on turnkey basis including design, supply installation testing and commissioning of all these jobs. We created a war like tempo at almost every project awarded to us and ensured completion of each job, commensurate with quality and workmanship, well before the scheduled time depending upon the availability of fronts. Various departments and multinational companies of international repute, builders and host of other sectors really appreciated our work and were awarded repeated orders from groups like Jaypee, Ansal-API, BPTP, JMD, Sunair Hotels Ltd., Taj Group of Hotels Ltd., Clarks Group of Hotels & are on the approved list of Rites.

Simultaneously, we started manufacturing single skin, subsequently double skin Air Handling Units, Fan coil units, Evaporative air cooling units, Air end terminal products, Fire and smoke dampers, Scrubbers & Acoustic doors etc. We have to our credit of completing projects involving our own make equipments in one form or the other.

Founded by Mr. Yashpal Taluja who has been at the helm of affairs since its inception joined with the dynamic sensibility of his son Mr. Aman Taluja, a qualified mechanical engineer made Brightflow evolve into a leading company specialized in the designing, manufacturing and installations of varied HVAC systems providing improved thermal comfort, ventilation efficiency and IAQ & E, ensuring lesser energy consumption & improved productivity and health. Our air-conditioning projects are testimony of our capability in executing projects in the capital, Rajasthan, Punjab, U.P., Himachal Pradesh etc.

Keeping in view our thrust on manufacturing line we are restricting our activities for execution in general with the agencies/ groups indicated above. Our main motto is to ensure that the manufactured products are as per latest international standards in respect of IAQ & E as well as the green building concept. Our three decades experience in the installation line gave us the in-depth knowledge and experience of each and every constituents going into the related equipment and we know and understand the pros and cons minutely, which we have incorporated for the benefit of the ultimate user.

Our manufacturing unit is located at Mangol Puri Industrial Area Phase-II, New Delhi & we are in the process of expanding the manufacturing activities in the areas adjoining Delhi to be announced in due course.

Manufactures Wide Range of Air Movement & Terminal Products

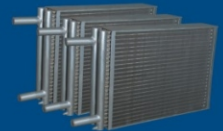

- Air Treatment units

- Fan coil units

- Cooling coils

- Evaporative cooling units

- Air Scrubbers

- Air terminal products

- Fire and smoke dampers
